## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

Applicant's election of Group 1 in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election without traverse of Group I. in Paper No. 5 is acknowledged.

Applicants' arguments are acknowledged, but it only includes a statement that the burden to examiner is not sufficient without reasons attached. These arguments constitute an insufficient response. However, on observation of claim 12, it does not appear that this limitation constitutes a separate patentable invention, and, accordingly, it has been examined with the other product claims. If separate patentability is associated with the limitations of this claim, then the restriction of this claim from group I will need to be reinstated.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the recited products having the desirable

Art Unit: 1711

characteristics defined by the claims, does not reasonably provide enablement for all products having these characteristics. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. Applicants' claims must be limited to the materials provided for by their disclosure.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Farkas.

Farkas discloses preparations of polyurethane foams which inherently possess the properties defined by applicants' claims owing to the similarities in materials utilized (see the entire document).

Art Unit: 1711

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Horn et al.

Horn et al. discloses preparations of polyurethane foams which inherently possess the properties defined by applicants' claims owing to the similarities in materials utilized (see the entire document).

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hager et al.

Hager et al. discloses preparations of polyurethane foams which inherently possess the properties defined by applicants' claims owing to the similarities in materials utilized (see the entire document).
